## 1 WHAT IS YOUR DREAM JOB?

Everyone wishes to get a dream job. Even you, I believe there was a time you wanted to work at a specific company. Well, getting the dream job according to career counsellors must combine your interests, skills, abilities and values. It has to be a motivated job that you are passionate about and not as an alternative in your life.

So from the beginning, try to understand yourself better, so that you can approach your dream job well. Think your dream job in a big picture and ask yourself these questions:

- What drives you to this industry?
- Do you want to develop in this career for life?
- What kind of lifestyle and achievement do you want to have?
- What are your personal qualities or preferences?

- What are the interests that you love doing?
- Which skills that you are good at and enjoy selling them?
- Are your values fit with the company you want to work?

These questions will make you more engaged in your dream job and at the end, being able to fight for your chances when achieving your goal.
